

DO YOU WANT TO BELIEVE IN GOD? THEN CONSIDER THE EVIDENCE.

#1 Creation

The marvellous detail in living things

The marvellous details of the physical constants that make the Universe suitable for life

Some to avoid believing in God have proposed an infinity of Universes “ Multiverse” but this is speculation not observation

It is likely that a very intelligent Divine Being made all this and that he is interested in [loves] His creation

#2 History

It is likely if there is a God that He will have announced His presence at some point in History

He has- in the life of the one religious leader who outshines all others as the sun outshines a hand held torch. His name is Jesus

You do not have to search every religion on Earth to find the truth. Nothing on Earth compares with Jesus. He wins hands down over everything as He alone has overcome death, our great enemy

#3 Proof

How do we know the Gospel story is true, that it actually happened? We can, using the lawyers' Rules of Evidence. These wonderfully thought through rules test documents and witness statements and can compellingly show if they are true or not. The jewel in the crown of arguments is this: In every generation there are honest people who will pass on accurately what they have seen or been told. Therefore historical testimony can be believed. History is science. History can be researched and believed, the truth is accessible to us today. Now go to the History Book-the Bible.
